Subject: Arkema Chemical Fire

Importance: High

Good morning,

Harris County Fire Marshall's EOC unified command has shared helicopter live feed recon of the aftermath of last night's event. Last night's event was the release of light to heavy white smoke at approximately 2045 hours from Trailer #1. This event lasted approximately 30 minutes. The live feed shows breached trailer doors (blown outward) from trailer's 1, 2, and 5. Trailer #1 is the trailer that is suspected of being the primary trailer involved in the event last night. There is liquid contaminant run off leading from all trailers and pooling in various locations. Point of concern from the liquid contaminant is the leading edge of the released liquid is that it has traveled approximately 100' towards the isobutylene AST. Our night crews were tasked with investigating suspicious smells and monitoring in those areas at 0300 hours. All non-detects on the monitors but smells were present during the night's investigations. Our crews will continue to monitor in our respective zones until the EOC Unified Command makes a determination on a plan moving forward. More updates to come.

Respectfully,

Toryus K. Brantley
